Infusion Directions:

- Bring vials to room temperature (no longer than 4 hours)

Dose calculation:

$$\text{Volume (mL)} = \frac{\text{patient body weight (kg)} \times 5\text{mg/kg}}{10\text{mg/mL Adakveo}}$$

Example: 75kg x 5mg/kg = 375mg ÷ 10mg/mL = 37.5 mL (2.5 mL waste) (requires 4 vials)

- Use a 100mL NS bag; remove the volume of NS from the bag to equal the required dose of Adakveo
- Add Adakveo to the NS bag; gently invert to mix. Discard and document drug waste
- Infuse through a low protein binding 0.2 micron in-line filter tubing over 30 minutes
