***Credentials must be included**

Infusion Directions:

- Remove vial and allow to warm to room temperature
- Withdraw 15mL of Tysabri from vial and inject into a 100mL bag of NS
- Gently invert to mix
- Infuse over 60 minutes (no filter required for tubing)

Nursing Considerations:

- Per the PI, patients are to be observed for the first 12 infusions. If no reactions occur, they do not have to stay for the observation hour. Defer to provider preference for observation time.
