Infusion Directions:

- Calculate the dose (mg), total drug volume (mL) of solution required, and the number of vials needed based on the recommended dose according to the patient's body weight
- Gently withdraw the calculated dose from the vial(s) with a sterile syringe and needle.
- Dilute the medication with 0.9% Sodium Chloride Injection, USP to make a total volume of 125 mL.
- Gently invert the infusion bag containing the diluted medication without shaking.
- Infuse over 1 hour using 0.2 micron in-line filter tubing
